Tools	Platform	tested	convert	reviews(stars)
MathType	windows	Yes	embeded	4.5
MathType	Mac	Yes	embeded	4.5
tex2word	windows	Yes	convert	3
TexPoint	Mac	Yes	Convert	1
GrindEQ_Math	windows	Yes	Convert	3

Tex2word and GrindEQ_Math

They have similar function that convert a tex file into word file from the word interface. However, GrindEQ_Math is more actively developed and compatible with latest version of office.

MathType:

It includes both mac and win version; can covert embeded tex formula.

Cons: only support math package; cannot define new function; can not redo if there are errors in your tex.

- Write anything your want firstly, embed tex formular without \$\$
- Finalize the other part
- Add \$ around your formula, and convert it using: option +

- ① full tex file convert
- ② embeded tex convert
