

modERN omnibus Gdoc

- Dmel sheets: marked by red
 - modENCODE_Dmel
 - Still need to populate with data from my spreadsheet
 - modERN_Dmel
 - modERN_Dmel_post_freeze
 - Dmel_controls
 - Dmel_post_processing
 - Information on where to get other items eg: HOTregions
- Cele: marked in blue
 - Equivalent sheets to Dmel

Omnibus modERN Dmel Sheet

1: typical metadata

2: file used, or not

3: location on IGSBmod server

4: DB info, old and new

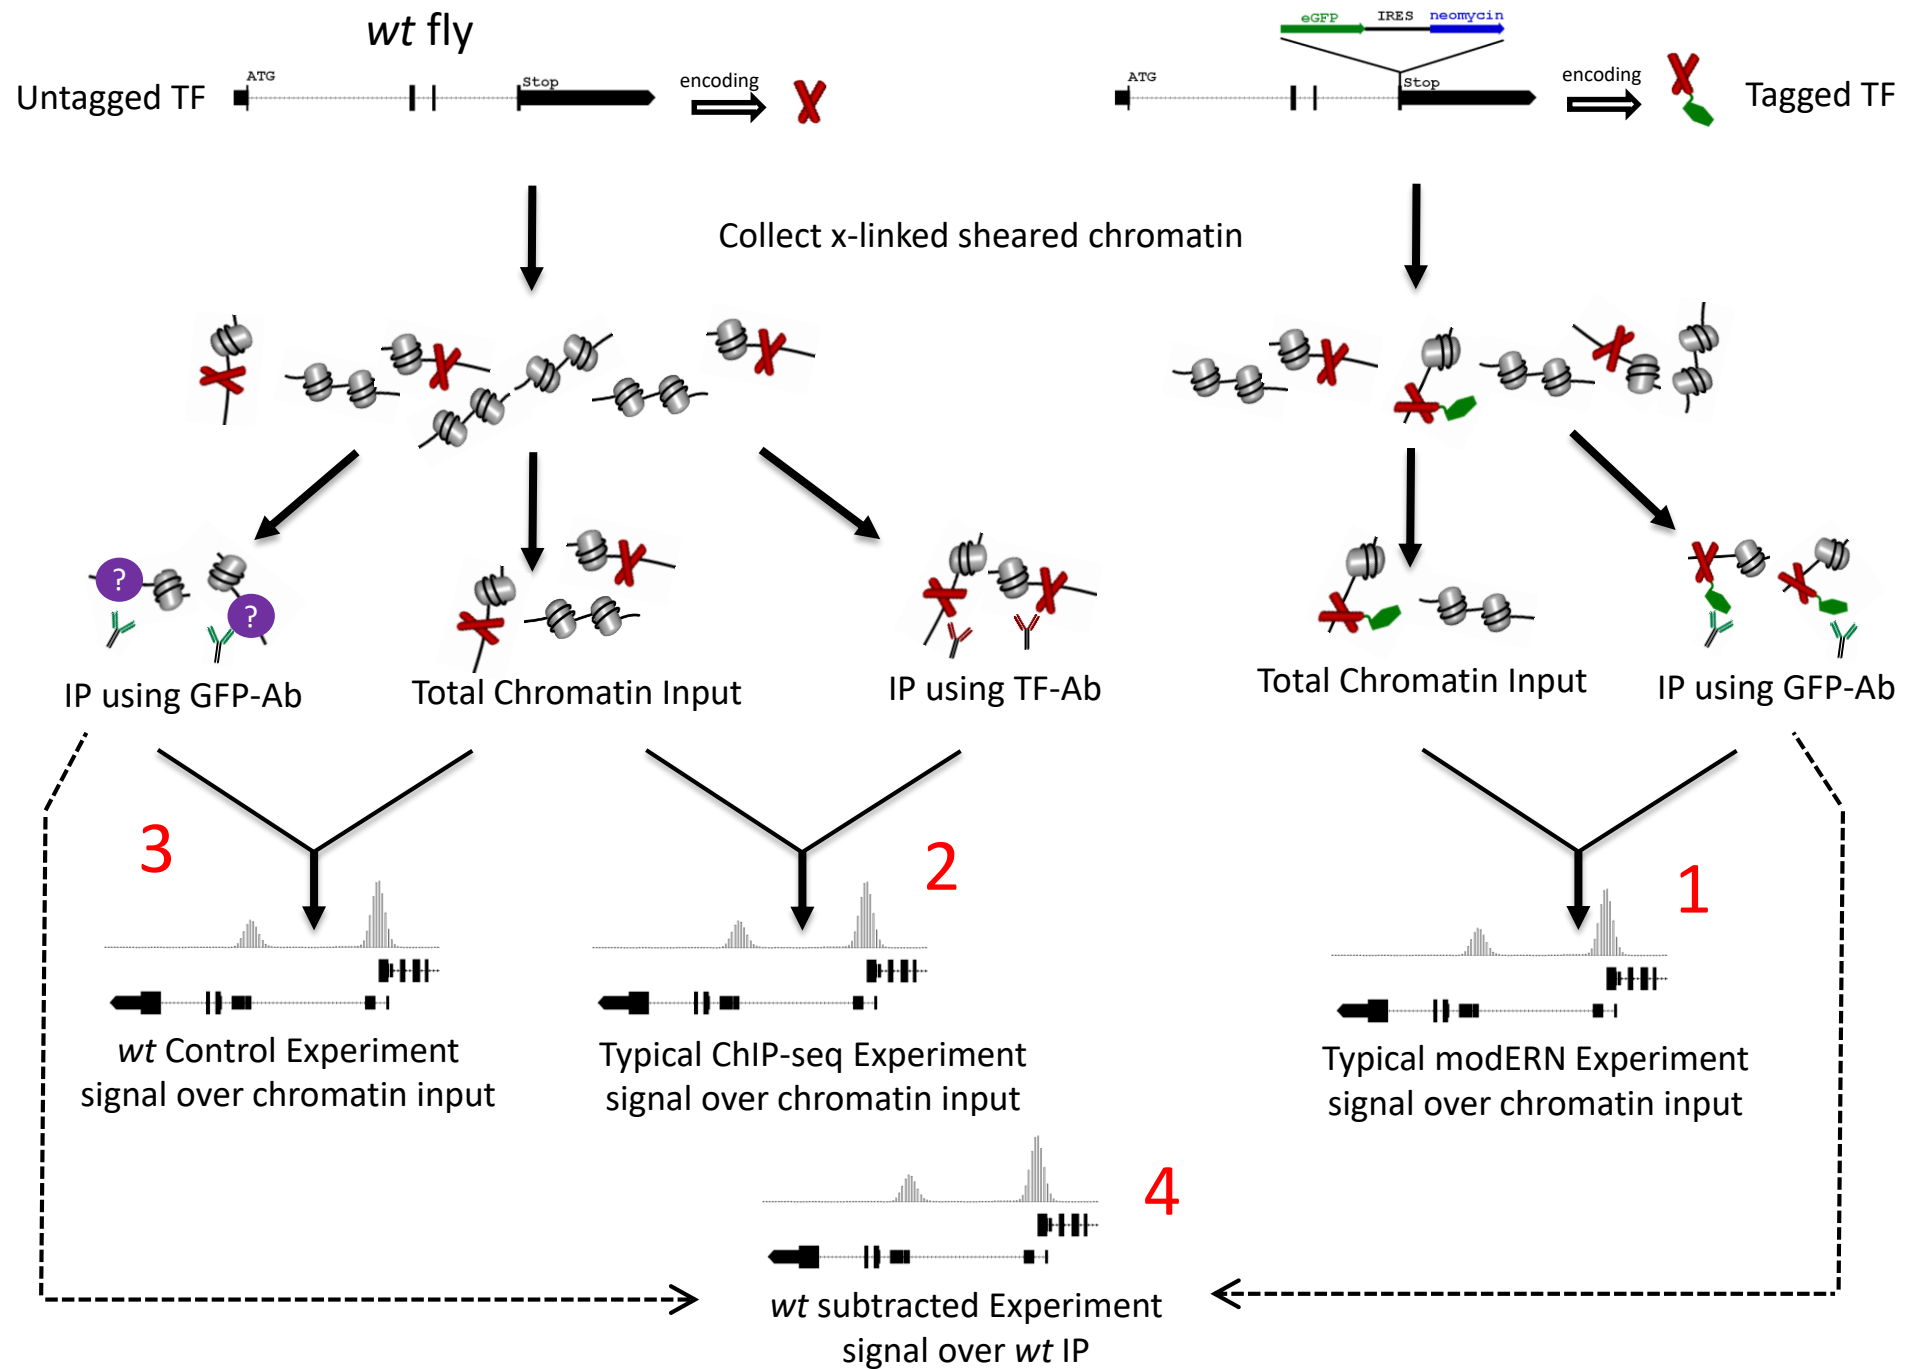

5: Still working on uploading

6: run data for both genomes

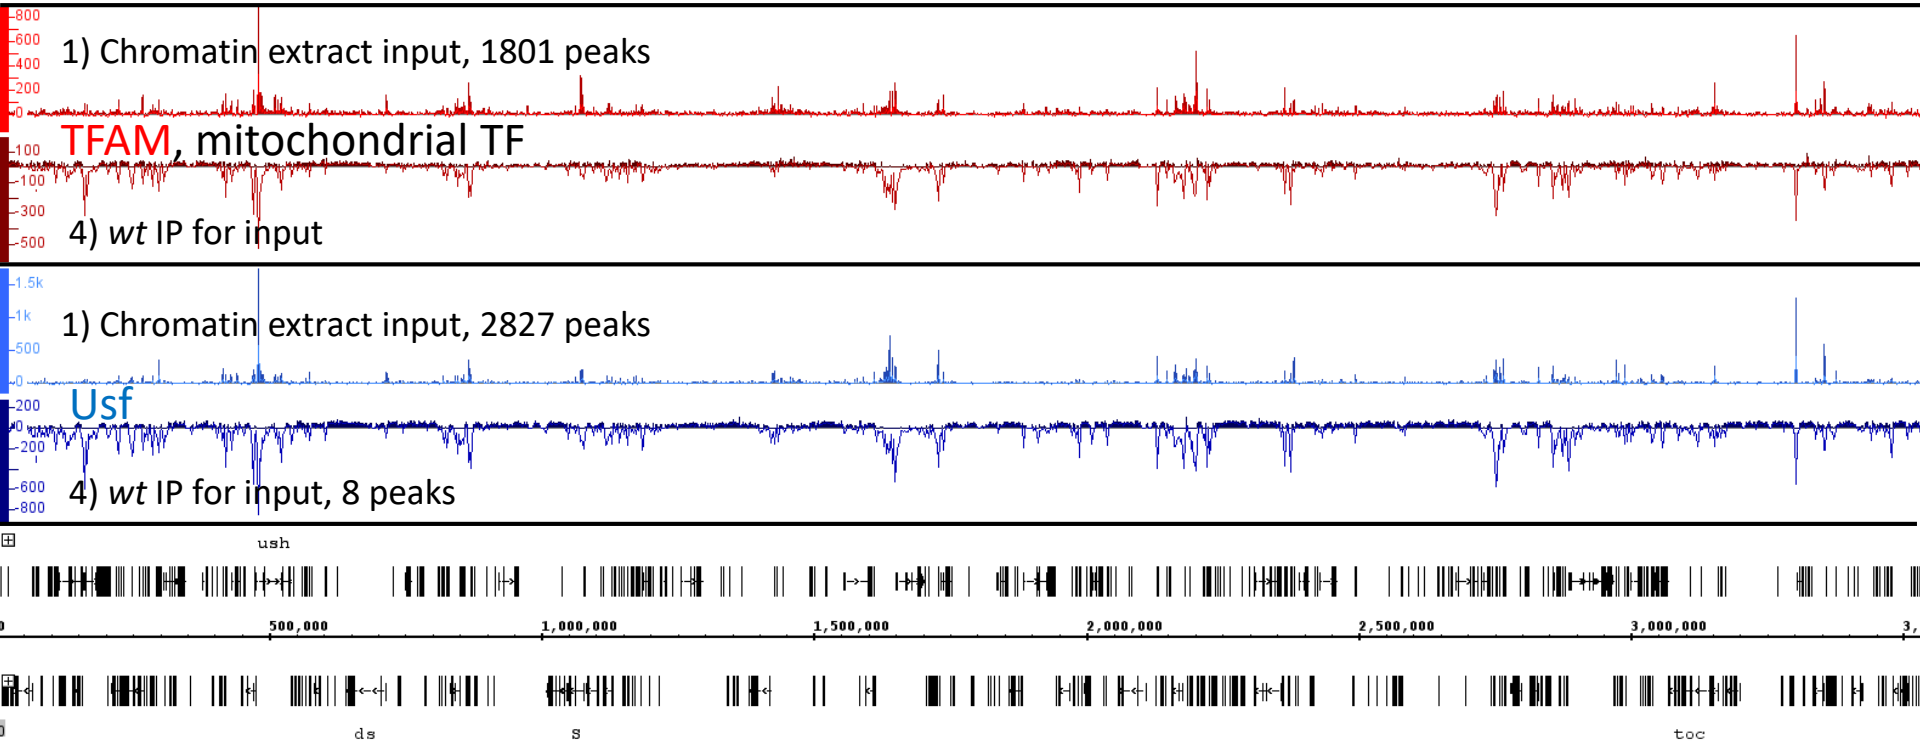

Need to split into sheet with Lou's list and sheet with *et alia*

Progress Summary

- Dmel:
 - Old Dmel data run, need to double-check datasets and files used
 - Some modENCODE fastq's uploaded to DCC
 - Need to finish.
 - ~25 new modERN datasets need to be uploaded
 - ~4 modERN datasets awaiting release for Ab290 vs GoatV comparison
 - 17 sets awaiting sequencing
- Cele:
 - See if “non-Lou” data is good, decide on uploading (80 datasets not registered by Esther, but some might be on the list)
 - Create new DCC replicate objects to finish uploading old data (~20)
 - 3 new datasets not loaded
 - Ab comparison for 20 sets to be released
 - 12 sets in pipeline at UofC

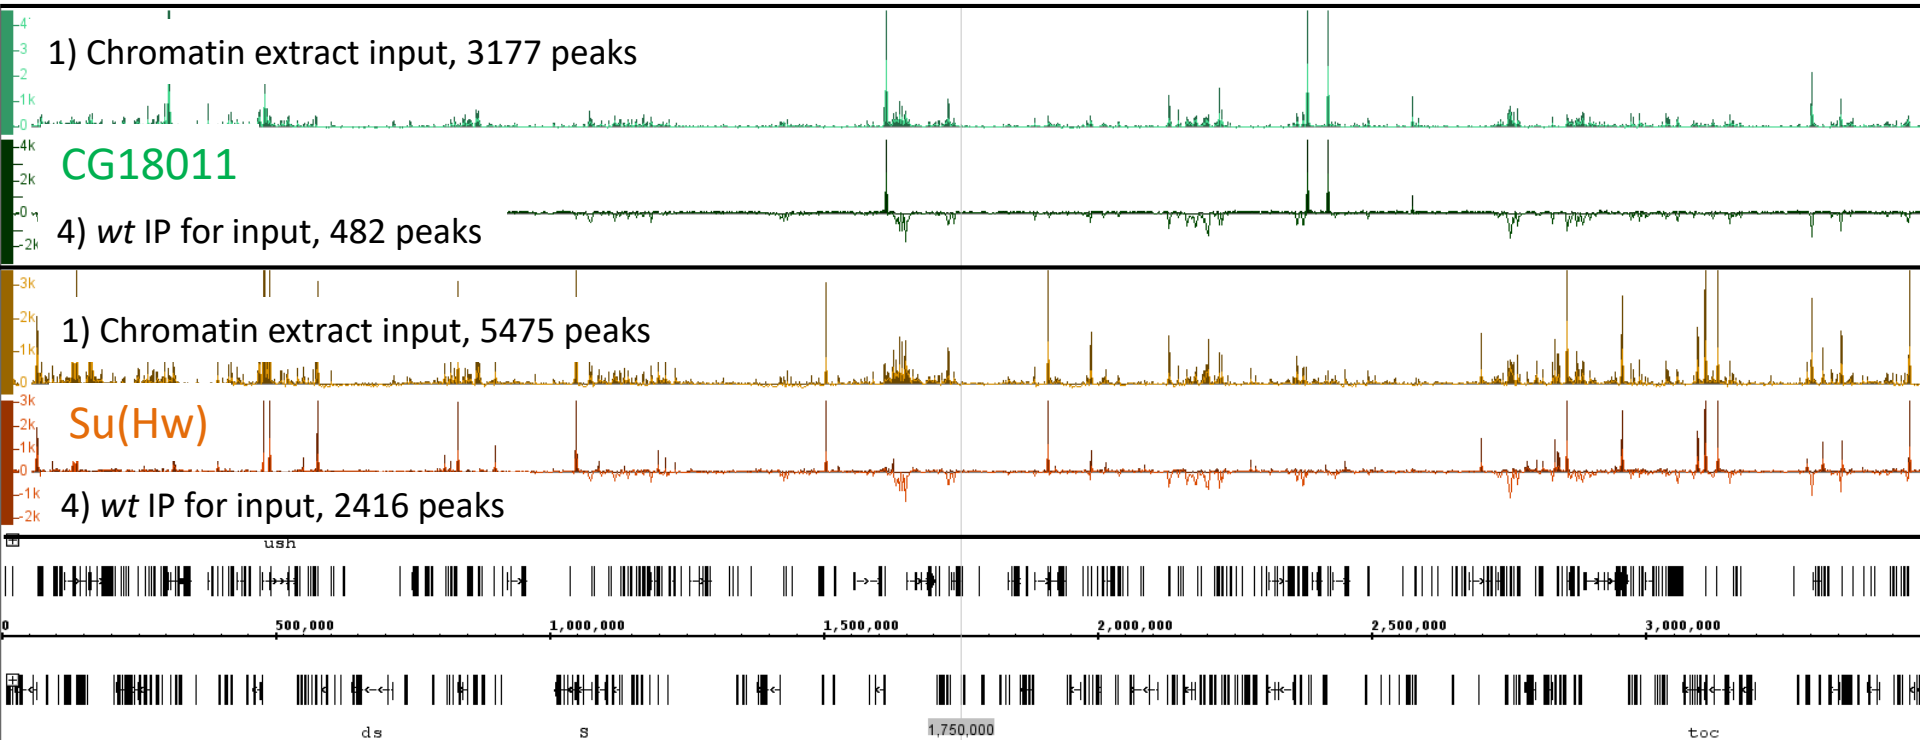

2 Questionable Datasets

2 Good Datasets

MEME predicted CG18011(C2H2 ZF) motif with top 50 peaks $E=2.4e-069$

Name [OTF0518.1](#)
[\[SU\(HW\)_DRONE_DNaseI\]](#)
 Database OnTheFly 2014
 Drosophila
 p-value 4.83e-05
 E-value 6.85e-02
 q-value 1.37e-01
 Overlap 11
 Offset -7
 Orientation Normal

Reported Su(Hw) motif

MEME predicted Su(Hw) motif with top 50 peaks
 $E=2.3e-119$

Final items

- Tried comparison between TF-Ab vs GFP-Ab, both wt-IP subtracted.
 - Motifs in GFP matched expected motifs when available
 - TF-Ab was new IPs not from modENCODE, matched wrong genes, and $\frac{3}{4}$ matched phol/PRE motif
- Plan on trying to subtract wt-IP datasets generated with Abcam GFP-Ab and FLAG-Ab from TF data.
 - Both have >50% overlap in peaks with GoatV.
 - Same peaks remain compared to GoatV.
- Expand MiMIC lines with GFP-FLAG tag.
 - Will same peaks remain when wt-FLAG-IP is subtracted from TF-FLAG IP?
