

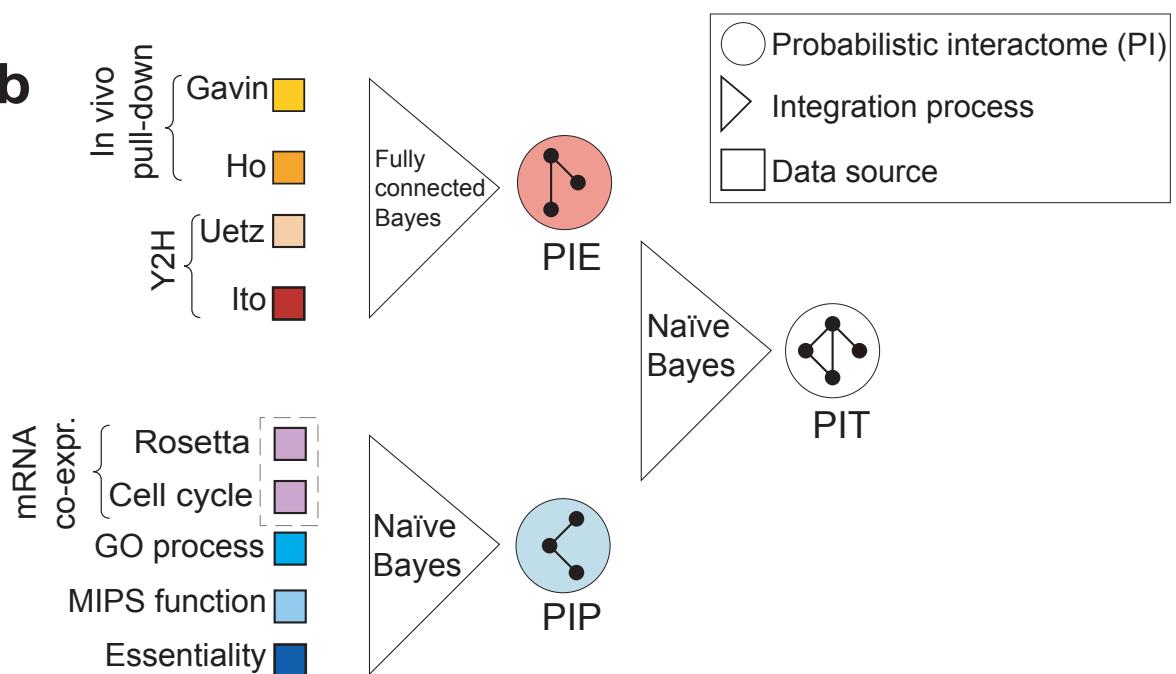

Figure 1

a

| Data type | Dataset | # protein pairs | Used for ... |
|-------------------------------|---------------------|--|--------------------------------------|
| Experimental interaction data | In-vivo pull-down | Gavin et al. Ho et al. | 31,304 25,333 |
| | Yeast two-hybrid | Uetz et al. Ito et al. | 981 4,393 |
| | Expression | Rosetta compendium | 19,334,806 |
| | Biological function | Cell cycle GO biological process MIPS function | 17,467,005 3,146,286 6,161,805 |
| Other genomic features | Essentiality | | 8,130,528 |
| | Positives | Proteins in the same MIPS complex | 8,250 |
| Gold standards | Negatives | Proteins separated by localization | 2,708,746 |
| | | | Training & testing |
